

The listing of the claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Claim 1 (Currently Amended). An apparatus for the dosed dispensing of a fluid, especially an infusion fluid, comprising a housing with a fluid chamber and a pressure medium chamber by which a flexible wall of the fluid chamber can be pressurized from the outside with a pressure medium, ~~characterized in that~~ wherein the housing (1) consists of two mutually detachably joined housing parts (6, 7), of which the one comprises the pressure medium chamber (3) and the other receives in an exchangeable manner the fluid chamber configured as a leak-proof infusion bag (2), and that the housing part (6) with the pressure medium chamber (3) is sealed by a membrane (5) against the housing part (7) receiving the infusion bag (2) and is connected to a gas pressure source (11).

Claim 2 (Currently Amended). An apparatus according to claim 1, ~~characterized in that~~ wherein the gas pressure source (11) is connected to the pressure medium chamber (3) by way of a control valve (12) and/or pressure reducing valve (13).

Claim 3 (Currently Amended). An apparatus according to  
claim 1 or 2, characterized in that wherein the gas pressure  
source (11) is connected in an exchangeable manner with the  
control valve (12) or pressure reducing valve (13) associated  
with the housing (1).

Claim 4 (Currently Amended). An apparatus according to ~~one~~  
~~of the claims 1 to 3~~ claim 1, characterized in that wherein the  
two housing parts (6, 7) are joined to each other at one side in  
an articulated manner and comprise a latching device (9) on the  
opposite side.
